AppMarket – All-in-one CPA Template with Admin Panel

BY CPACREATORS /  0 / CPA LANDING PAGES TEMPLATES / GAMING

Explode your earnings with AppMarket

AppMarket is a pretty famous template used by a lot of marketers. There's a variation with only a search bar which is pretty bad and this is the best template right now!

The template is available for free and unlimited domain which is by itself amazing! It comes with an Admin panel to edit the general design of the template and add or delete new apps in the catalog.

Price: FREE
License: Unlimited
Version: 1.3
Type: PHP / HTML / JS
Creation date: 26.01.2024

[DOWNLOAD NOW](#)[DOCUMENTATION](#)[DOWNLOAD ALL](#)

NOTE: Download from Google Drive, it might take some time to launch

How to use the AppMarket Template

You can access the admin panel by going to `yourdomain.com/admin`, we configure the admin panel like this:

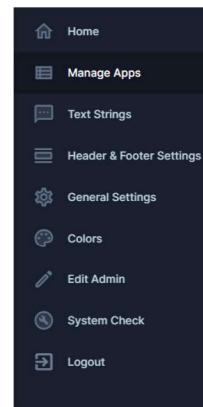

Admin Username: admin

Admin Password: admin123

There are multiple sub-menus that will allow you to edit the general design of the template, colors, header, footer, various text strings, and the apps that you want to promote.

When you want to add a new app, you have various possibilities but you will need an app image, app name, app description, and the redirect URL which is your content locker URL. It's very easy to manage and add new apps on the go.

You can use Google Play API extractor to easily get your content and image from the play store itself.

Add a new app

You can add a new app to your app list by using the form below. You need to include the app image, app name and app description.

Apps are positioned by descending order, which means that the app which you add first, will be showed on very top of the list.

App Image*

Aucun fichier choisi

Recommended Size: 100x100px
Accepted Extensions: .png, .jpg, .jpeg

Featured App

☐ NO

Show this app in featured section?

Downloads

100K+

App Name*

App name which will be displayed in main app listing grid.

Short App Name*

App name used in processing.

App Author

App Rating

4.8

App Description*

Redirect URL*

Link to which your visitor is redirected after console processing is finished. Important: Do not enter your content locker script here! You can enter a direct locker URL.

[Add new app](#)

How to Upload and Host your CPA Landing Page

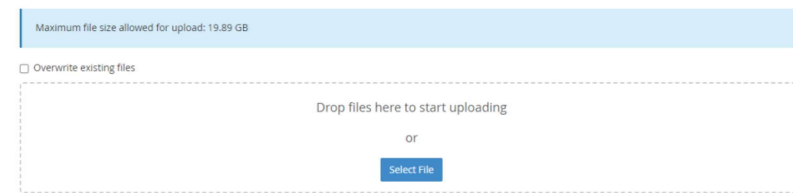

We use [Namecheap](#) hosting and domain in this example. It's my favorite hosting right now, and you can host +100 domains on a single hosting which is very cheap.

- Step 1: Upload the ZIP file on your cpanel hosting

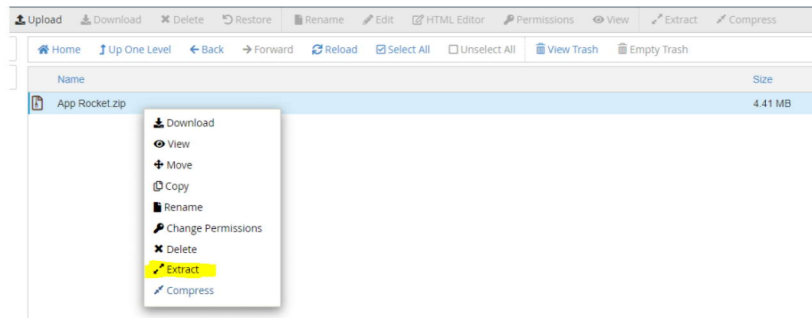

Select "Upload" one CPanel

Drag & Drop the ZIP file called "AppMarket.zip"

Select Extract on the .zip file you just upload

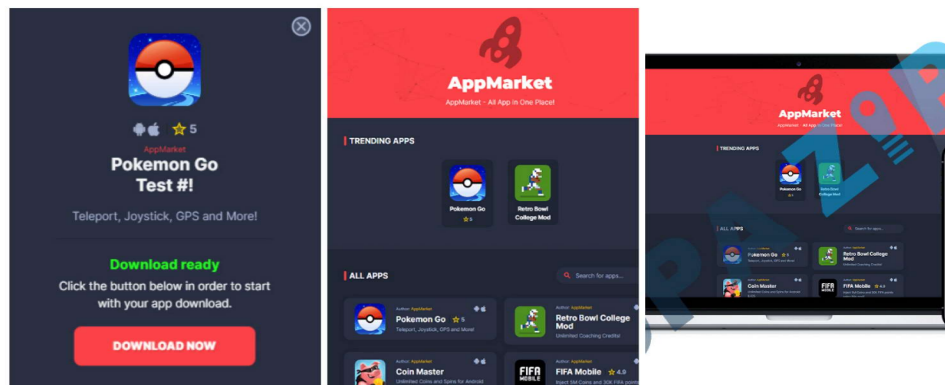

Boom! You're done with CPanel and the upload process and you can now fully edit your CPA landing page from the dedicated admin panel located in /admin which would look like this: yourdomain.com/admin

By default, we configure the admin panel like this:

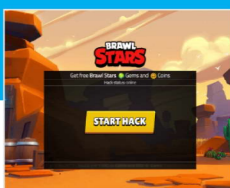

Admin Username: admin

Admin Password: admin123

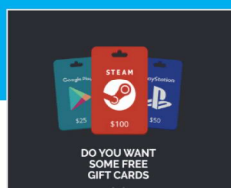

Warning: When you access the admin panel for the first time, please change the admin username and password as soon as possible! Edit your informations in the "Edit Admin" Section of the panel!
